Our Vision

To conquer the world, one child at a time in a safe and positive environment, by preparing each child for their own successful future.

Our Mission

In order to create and move towards the future we need to constantly remind ourselves of the fact that we are working with the soul, heart, mind and future of a child. Without our own core-values no vision can become a reality. By following and establishing and educating our students we as part of the Conquerors-family need to eat, drink, live and stay true to what we as a Conquering family believes.

Our Values

- C** - By **CARING** for ourselves and one another, we can create a world where everybody feels loved
- O** - To be **OPTIMISTIC** about everything we do, we have the power to change the mind set of those around us
- N** - **NURTURING**, to nurture a child, helps us and the child to establish their own roles they play in life
- Q** - **QUALITY EDUCATION**, is the most important – Education can change the world
- U** - **UNIQUENESS** and understanding, every child is unique and we at Conquerors believe that by Understanding each child we can create a social environment where each child can be themselves among others.
- E** - By **EMPOWERING** ourselves and others our future will always be bright, like our students here at Conquerors
- R** - By taking **RESPONSIBILITY** for our actions, we stand as leaders in our school, communities and the World
- O** - Creating **OPPORTUNITY** for each and every student and to coach them to chase their dreams
- R** - To **RESPECT** ourselves, others will follow. An environment where everybody can be themselves and respect others for being themselves as well.
- S** - **SELF-ACCEPTANCE** is a very important value. We all need to know who we are, what we like and it's acceptable to be you. Love yourself first and be comfortable in your own skin. Remember: Everyone is different and special in their own way.
